

Welcome to the Step2PolyGreen Project Annual Newsletter!

As we enter the final stretch of the **Step2PolyGreen Project**, we are proud to share the progress and achievements that have marked this concluding year. Our dedicated team of researchers has continued to push the boundaries of sustainable polymer development, building on the momentum of previous years. This final annual newsletter offers a comprehensive recap of our latest milestones and celebrates the collaborative spirit that has defined our journey from start to finish.

Year in Review:

Milestone 1: Previously prepared prepolymers used for nanocellulose-reinforced polymer composite materials

Milestone 2: Other kinds of previously prepared prepolymers modified in order to have more desirable properties

Project Highlights:

Highlight 1: Team members held a students workshop on Biobased polymers

Highlight 2: Team members prepared a short industry-oriented guidebook

Highlight 3: Team members prepared a patent application for a novelty in developing nanocellulose-reinforced polymer composite materials

Highlight 4: Team member prepared a patent application for a novelty in developing a bio-based UPR with more desirable properties

Community Engagement:

The Step2PolyGreen Project was showcased across different social media platforms as well as an official website with content tailored for both the general public and fellow researchers!

Over the past year Step2PolyGreen Project engaged with over 700 accounts on Instagram and over 9000 impressions on LinkedIn!

Follow us on social media for the latest updates and join us in our mission to create a more sustainable future in the world of polymer materials!
